

UKRAINE

German-Ukrainian Cooperation in Organic Agriculture (COA)

Cooperation between Germany and Ukraine in organic farming through capacity building and strengthening of structures

The Agriculture in Ukraine

In Ukraine, there are around 400 organic farms covering about 260,000 hectares. The government supports the expansion of organic farming and is trying to increase the area under organic cultivation. Despite the war, farms have been able to obtain organic certification under a separate law since August 2023. Even during the Russian war of aggression against Ukraine, the Ukrainian organic sector continues to operate and market its products at home and abroad.

The Project

The project aims to support the Ukrainian government in implementing the Ukrainian law on organic farming. The Ukrainian law on organic farming has been fully adopted. In addition, the project is developing a digital knowledge platform for organic farming in Ukraine and supporting organic farming organisations in Ukraine.

Project Goals

- The authorities are able to carry out the tasks assigned to them by the Organic Farming Act in a professional manner.
- The Scientific Centre for Training and Higher Education independently operates a knowledge platform on organic farming.
- Private and public institutions strengthen the professional dialogue within the organic sector and promote its national visibility.

PROJECT TITLE
Cooperation in Organic Agriculture (COA)
Deutsch-Ukrainische Kooperation Ökolandbau
Phase II

TIMEFRAME
09/2020 bis 08/2025

AS OF
April 2024

Organic Farming

With support from

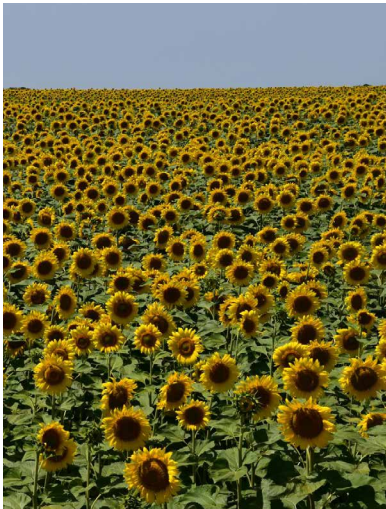

Federal Ministry of Food and Agriculture

by decision of the German Bundestag

Despite the war, more than 100 farms have already been certified under Ukraine's own organic farming law since August 2023.

PORTRAIT UKRAINE

With an area of more than 600,000 square kilometres, Ukraine is the largest country whose borders lie entirely within Europe. Almost 42 million inhabitants live in Ukraine; with 77 inhabitants per square kilometre, the population density is relatively low (Germany: 233).

Results and Successes

COA actively supports the relevant ministry in all matters relating to organic farming by coaching and training the responsible authorities in the implementation of the law.

To date, more than 600 articles have been published on the Ukrainian-language knowledge platform. Thanks to targeted aid, most of Ukraine's organic farms have survived the Russian war of aggression.

Project Partners and Cooperations

- Ministry of Agricultural Policy and Food (MAPF)
- Ministry of Education and Science (MBW)

Project Partner on Operational Level

- Food Safety Agency (FSA)
- Scientific and Methodological Centre for Training and Education (NMZ)
